

i AberNormous a large-leaf white clover suitable for rotational dairy/ cattle grazing and superior production silage pastures.

Product Information

Scientific Name

 *Trifolium repens*

Sowing Rate

 3 – 5 kg/ha

Blend Rate

 1 – 3 kg/ha

Leaf Size

 Large

Key Features

- Combined with AberDance, provides high yielding pasture for high-fertility lamb fattening systems
- Retains excellent digestibility throughout the season
- Improved stress tolerance, grazing tolerance, pest and disease resistance

Plant Characteristics

- Larger leaf size and higher stolon density than other similar clovers
- Dense stolon growth for greater persistence

Where can I grow it?

- Best suited to medium to high rainfall zones or irrigation
- Responds well to spring and summer moisture
- Will grow in a wide range of soil and fertility conditions
